

Literacy

We will be focussing on the stories: *Jack and the Beanstalk*, *The Rainbow Fish* and *Commotion in the Ocean*. Every day we continue to support the children when writing their names when signing in or labelling their work. The children have also been writing labels for the produce they are growing.

Communication & Language

The children will be building on their vocabulary by learning new words, and then use them in their play.

Understanding the World

We will be making our own bird feeders to hang outside and observe the birds using binoculars that each child will make. From their newly created pond area the children will be looking at what creatures live on the surface of the water, or under the water, as well as building our very own bug hotel for the children to explore and investigate where bugs live.

Physical Development

The children are extending their co-ordination skills when using the real tools in the tool station. Learning how to use them effectively and safely. They will be exploring ways to create their own balancing structures.

Under The Ocean On The Land In The Air

Preschool

Personal, Social and Emotional Development

There will be lots of activities to encourage the children to work together, take turns, share and ask each other for help.

Maths

We will continue to support then children when counting to 20. Using number recognition through snack time. The children will look at the shapes and sizes of different creatures and counting their features. Each child has planted their own beans. As they start to grow the children will measure and compare lengths over time.

Expressive Arts and Design

The children will use many different resources to create their own sea creatures. We will create opportunities for the children to engage and develop an idea that will support their role play.
